

We are a technology recruitment partner focused on search and selection of IT experts internationally. Currently, we are looking for an accomplished experts for the role of Big Data Architect. We offer a rewarding and exciting professional experience and opportunity to develop your career in a highly competitive international environment.

Big Data Architect

Location: Warsaw, Poland

As a Big Data Architect you will be at the heart of the organisation.

We all know that data is hot and that companies need to use the data to come to insights.

But do they know who is using their data? And which data?

As a Big Data Architect, you will support our stakeholders to take control of their data and getting value out of it by defining a reference architecture.

This means that you will work closely with business leaders and information management teams to define and implement a roadmap on data management, business intelligence or analytics solutions.

Scope of responsibilities:

- ◆ Defines, challenge and prioritize with customers data requirements.
- ◆ Design advanced conceptual, logical and physical data organizations, models, repository, dashboards, reports within a complete functional and technical architecture.
- ◆ Partners with other architects, infrastructure and software experts to define metadata layers, technical strategy and optimal integration within existing organization's IT landscape.
- ◆ Translate to technical designers or developers designed solution, review proposed solution and optimize it when required.
- ◆ Participate to the definition of testing strategy.
- ◆ Ensure business access to adequate, understandable, accurate data.
- ◆ Design, develop and continuously improve supporting activities (automation of versioning and release management, scheduling, security models, impact assessment of new changes ...)
- ◆ Accountable for End to End solution.

Qualifications:

- ◆ +5 years of professional experience in similar key responsibilities
- ◆ Advanced knowledge in data warehouse dimensional modelling.
- ◆ Hands on knowledge with at least one Key ETL Market tool (Microsoft SSIS, Informatica PowerCenter, SAP BW/HANA, IBM DataStage, ...)
- ◆ Hands on knowledge with at least one Key BI Market tool (Microsoft Power BI, Tableau, Salesforce Einstein ..)
- ◆ Hands-on knowledge of enterprise repository tools, data modelling tools, data mapping tools, and data profiling tools. (SAS, R, ...)
- ◆ Hands on knowledge with at least one Cloud Analytics Services such as Microsoft Azure (Data Factory, Data Lake, Data Warehouse...)
- ◆ Knowledge of latest market trends: Big Data (Hadoop, Spark, Hive), AI, Cloud (Azure, AWS) , Mobile
- ◆ Experience in working in large cross boarder projects

Offer:

- ◆ Challenging and innovative global projects
- ◆ Fresh fruits every day
- ◆ Flexible work hours
- ◆ Competitive salary
- ◆ Training package

Interested candidates should send their resume (CV) to konrad.witek@itpuzzle.com.pl with „Big Data Architect” in the subject line.

Please, add the following clause to your resume:

I hereby agree for processing my personal data, included in my job offer by IT Puzzle Recruitment Sp. z o. o. with its seat in Warsaw, 00-566, at ul. Puławska 2, for the purpose of recruitment. I acknowledge that I have the right to access and rectify abovementioned personal data, as defined in the Act of August 29, 1997 on the Protection of Personal Data (Journal of Laws of 2014, item 1182, with amendments). Submitting personal data is voluntary, but necessary to accomplish the recruitment.
