IT PUZZLE
RECRUITMENT

We are a technology recruitment partner focused on search and selection of IT experts internationally. Currently, we are looking for an accomplished experts for the role of Front-End Architect (React+Redux). We offer a rewarding and exciting professional experience and opportunity to develop your career in a highly competitive international environment.

Front–End Architect (React+Redux)

Location: Warsaw, Poland

Role Purpose:

As an Architect within a web development team, you'll be responsible for the scaffolding, design and implementation of modern JavaScript-based in-browser applications for both Internet & intranet. This responsibility will not be restricted to your own actions only, but will extend to your more junior team members as well.
On the daily basis, you'll actively collaborate with geographically-dispersed, cross-functional teams to define & maintain APIs, test, and deliver complex end-to-end software solutions in a timely fashion.
More precisely you will:

- Communicate with UI/UX, business, analyze and suggest efficient solutions based on their requirements
- Define and maintain architecture roadmap, technical solutions for new and existing functionality for each parts of the projects
- Take the ownership over architecture qualities of front-end applications (e.g.: usability, accessibility, performance, etc.)
- Good active listener, being able to hear and include propositions from FE engineers in final solution (anti ivory-tower syndrome)
- Deliver architectural services, including guidance and conceptual design as well as technical and process innovations
- Work with FE engineers to generate and maintain code according to the agreed coding standard and best practices
- Bring a passion to remain up-to-date with the latest trend of ever-changing web front-end development.
- Investigate latest technology and build quick Proof of Concept functionalities to address future business needs
- Preparing, improving and introducing new approaches/methodologies/tools and techniques within department
- Work to meet delivery commitments of feature content throughout the whole Software Delivery Lifecycle (SDLC).
- Preparing of technical documentation

Skills & Experience required:

- Bachelor degree, Master or Engineering in computer science field or other relevant degree.
- Practical work experience (& up-to-date theoretical knowledge) with React & Redux is essential
- 7+ years of professional experience as a front-end JavaScript developer
- 2+ years of professional experience as a Architect / Lead in projects with heavy use of modern frontend technologies
- 3+ years in design and building SPA applications using a application building framework / library (Angular 1.x/2.x, React, Ember, Aurelia, Vue, etc.)
- Familiarity (typical everyday usage scenarios) with modern JavaScript development toolset ("build" tools, packaging, linting, transpilers)
- Confirmed project track of building enterprise-grade, Internet-facing web applications for business users (e.g.: security, RESTful Web API design, HTTP in-depth, test automation in the browser, i18n)
- Practical proficiency with static typed ES dialects (Flow, TypeScript) & RxJS (Observables)
- Experience working in an Agile/Scrum development process
- Ability to work well in an international and multicultural environment in a fast-growing company.
- Fluency in English required.
- Self-driven, team player, good communicator & facilitator.

Offer:

- challenge, opportunities to exchange skills within multinational team
- ability to work in an autonomous way and in an environment where your ideas are valued
- interesting trainings
- health care
- Multisport card
- French classes
- flexi-time and home-office
- competitive salary aligned with experience
- casual and very friendly environment
- possibility to work in other Client location

Interested candidates should send their resume (CV) to
