

We are a technology recruitment partner focused on search and selection of IT experts internationally. Currently, we are looking for an accomplished expert for the role of Native Apps Product Analyst. We offer a rewarding and exciting professional experience and opportunity to develop your career in a highly competitive international environment.

Native Apps Product Analyst

Location: Warsaw, Poland

Scope of Responsibilities:

- Discover and define mobile applications requirements in the space of business goals, business needs, defining the true problem, scoping the business case for making an investment, and discovering the business process and related changes.
- Collaborate with business users, product managers, developers, IT experts and other product/business analysts to conduct key business analysis activities throughout the various phases of the mobile applications business analysis life cycle.
- Elicit requirements through the use of application design sessions, interviews, document analysis, requirements workshops, surveys, business process descriptions, business analysis, user stories, scenarios, task and workflow analysis, and solution presentation.
- Ensure that all stakeholders have sufficient clarity towards requirements and are involved in their review.
- Proactively speak up as well as follow up, in the event of missing requirements or gaps and ensure that these are appropriately addressed.
- Create and maintain the documentation of each of the products in team's portfolio.
- Document and organize current and planned mobile development framework processes.
- Assist with creating test case scenarios and coordinating testing efforts.
- Estimate product development costs and timelines.
- Help define and manage mobile app product roadmaps based on team strategy and vision.
- Actively drive the enhancements and modification of supported products and processes related to them.
- Report on best practices, mobile industry standards, competitor's products and legal requirements associated with assigned mobile app projects.

Skills & Experience required:

- Bachelor's degree in marketing research or IT related disciplines.
- Proven practice in product/business analysis techniques, with at least 3 years of experience.
- Ability to work with globally distributed diverse group of business and technology partners to identify and analyze project requirements.
- Experience in design and modification of business/IT systems.
- Strong analytical, planning and problem-solving skills
- Self-managing attitude - including self-development, time management, and delegation.
- Working knowledge and interest via business and/or personal endeavours of a broad range of digital marketing technologies.
- Ability to communicate ideas in both technical and user-friendly/business language.
- Ability to quickly understand business needs.
- Proven stakeholder management.
- Knowledge of technology standards, solutions modelling and services design.
- Demonstrated ability to apply technology solutions to business problems.
- Knowledge of security, database principles and operating systems.
- Ability to work in complex corporate environment.
- Ability to understand technical development projects and work closely with a highly skilled technical team.
- Good command of project management tools, e.g. JIRA, Confluence, ASANA
- Fluent English skills.

Bonus Points (Would Likes)

- ♥ Any professional certification in digital technologies or project management.
- ♥ Knowledge of AGILE software development methodologies, e.g. Scrum, DSDM, XP, FDD, SAFe.

Offer:

- ♥ Challenging and innovative global projects.
- ♥ Fresh fruits every day.
- ♥ Flexible work hours.
- ♥ Competitive salary.

Interested candidates should send their resume (CV) to konrad.witek@itpuzzle.com.pl with „Native Apps Product Analyst” in the subject line.
