## Senior Cloud Architect

Location: Warsaw, Poland

### Role Purpose:

We are looking for a Senior Cloud Architect to work on the next generation of the Client ratings platform. In this role, you will lead a core team of 3 - 4 engineers that will be delivering both the architecture as well as the implementation of various core services needed for the new microservices based cloud platform. You will bring a focus to the scalability and quality of the new solution. Additionally, experience in automation and state-of-the-art development tools like containers, Kubernetes and Lambda architectures are a must have. The role reports to the VP of Engineering and you can be based remotely.

### Scope of Responsibilities:

- ◆ Communicate with business, analyze and suggest efficient solutions based on their requirements
- ◆ Define and maintain architecture roadmap, technical solutions for new and existing functionality for each parts of the projects
- ◆ Deliver architectural services, including guidance and conceptual design as well as technical and process innovations
- ◆ Work with developers to generate and maintain code according to the agreed coding standard and best practices
- ◆ Investigate latest technology and build quick Proof of Concept functionalities to address future business needs
- ◆ Preparing, improving and introducing new approaches/methodologies/tools and techniques within department
- ◆ Preparation of technical documentation

### Skills & Experience required:

- ◆ Excellent knowledge of all aspects software engineering processes, including Coding, Testing, Deployment, Scalability, Security, Maintainability
- ◆ Excellent knowledge of scalable Cloud Software Development & architectural patterns
- ◆ Good knowledge of Microsoft stack (.Net, .Net Core, Web API, SQL Server)
- ◆ Excellent knowledge of Azure Cloud Services or AWS
- ◆ At least 5 years of experience in defining architectural patterns (SOA, CQRS, Event Sourcing etc.)
- ◆ Very good knowledge in NoSQL such as MongoDB, Cassandra, Redis, ElasticSearch, for either data persistence and/or caching
- ◆ Vast experience in API Management (routing, gateways, versioning) with profound understanding API Development aspects
- ◆ Extensive experience in Front-End, including frameworks (Angular, React/Redux etc.), patterns (MV\*), understanding client's point of view on performance aspects
- ◆ Experience in working with global and regional projects, virtual expert teams, appreciating local differences and adapting to difference in cultures
- ◆ Excellent interpersonal and communication skills
- ◆ Proficiency in English

## Offer:

- ♥ challenge, opportunities to exchange skills within multinational team
- ♥ ability to work in an autonomous way and in an environment where your ideas are valued
- ♥ interesting trainings
- ♥ health care
- ♥ Multisport card
- ♥ French classes
- ♥ flexi-time and home-office
- ♥ competitive salary aligned with experience
- ♥ casual and very friendly environment
- ♥ possibility to work in other Client location
