

We are a technology recruitment partner focused on search and selection of IT experts internationally. Currently, we are looking for an accomplished experts for the role of Senior Automation QA Engineer. We offer a rewarding and exciting professional experience and opportunity to develop your career in a highly competitive international environment.

Senior Automation QA Engineer

Location: Krakow, Poland

Role Purpose:

Working as part of the Pricing team, you will be responsible for the testing of pricing applications including backend and frontend solutions. Your role will be testing and creating automated tests of new services and APIs for new versions of company applications. Integration with other company services will be required and in some cases redesign of some functionalities and data model based on new requirements.

We are looking for a Senior QA that will be responsible for the overseeing the QA process and automation in a range of key projects. You can be involved in ensuring services reliability and conduct performance and load testing if necessary. You will be expected to make an active contribution to this process and be prepared to offer ideas and solve problems at every stage of each project.

Scope of Responsibilities:

- ✦ Liaise with the business/developers/BAs at concept stage to determine testing strategy and coverage
- ✦ Actively participate in sprint planning sessions and ensure requirements are clear and complete
- ✦ Provide accurate estimation for sprint planning
- ✦ Create test cases, BDD specifications and data (manual and automated)
- ✦ Ensure that adequate test coverage is provided
- ✦ Assess the impact and risks of new functionality introduced into the system and plan regression testing and/or highlight any potential issues
- ✦ Participate in team stand ups
- ✦ Actively implement Test Automation where possible and ensure that it is up to a certain standard
- ✦ Understand and Maintain the existing test automation suite where required
- ✦ Execute test scripts and analyze and record results
- ✦ Identify defects/ anomalies and investigate their cause. Document and track these defects.
- ✦ Recommend improvements or corrections to developers or system analysts
- ✦ Review log files and reports to identify program processing errors and possible improvements
- ✦ Actively seek to gain and improve knowledge of systems and functionality
- ✦ Train and Mentor new members of the QA team
- ✦ Conduct Peer reviews of test artifacts from coverage and correctness perspective
- ✦ Transfer system and functional knowledge to team members and other QAs as required
- ✦ Monitor multiple projects/software changes from concept to release and confirm correct behavior after release to live
- ✦ Building Testing Efficiencies within the team
- ✦ Understand and adhere to the GAIN Capital Change Request and QA process
- ✦ Be responsible for all phases of testing across various test environments
- ✦ Coordinate with Service Delivery teams to ensure the timely and correct release of software to live
- ✦ Contribute towards improving the QA process and quality standards across the organization
- ✦ Evaluate testing tools and software that can be implemented to aid QA and maximize testing coverage
- ✦ Actively participate in knowledge sharing and team building exercises within the QA organization

Skills & Experience required:

Required:

- ♥ Good knowledge of the software development lifecycle
- ♥ Good knowledge of QA practices and processes
- ♥ Experience of testing web and client-server applications
- ♥ Experience working in an Agile environment and BDD
- ♥ Experience working in all phases of software testing right from requirements analysis up until QA/UAT sign off and release to live
- ♥ Strong in Programming fundamentals and C#/.NET knowledge
- ♥ SQL Server & T-SQL skills
- ♥ Experience in testing (manual and automation) of Webservices, Windows services, REST services
- ♥ Experience in test automation using a BDD tool (SpecFlow)
- ♥ Experience in building tools and utilities for automating testing tasks
- ♥ Experience in building, deploying and releasing software by working with developers
- ♥ Experience working with version control, build & deployment and test management tools (GIT, TFS, Jira)

Desired:

- ♥ Experience in performance and load testing will be a big plus
- ♥ Experience in debugging software
- ♥ Experience in reviewing application code
- ♥ Experience in building tools and utilities for automating testing tasks
- ♥ Experience in testing financial applications especially Trading platforms and services and reporting solutions
- ♥ Good business/ financial knowledge especially Trading CFDs, spread betting and Forex would be helpful

Qualifications Required

- ♥ A degree in Computer Science or related IT experience

Offer:

- ♥ Work in a startup-like environment that encourages ideas and creativity
- ♥ A team of experienced developers helping each other improve their skills
- ♥ Ability to choose the equipment you work with
- ♥ Standing desk and ergonomic chair
- ♥ Spacious and cozy office space in the heart of old Kraków
- ♥ Flexible working hours and the possibility to work remotely
- ♥ Competitive benefits package, including health care and gym pass (Multisport)
- ♥ Kitchen full of coffee, tea, snacks, and fresh fruit
- ♥ Salary in line with the market
- ♥ Co-working, mentoring and personal development
