Location: Krakow, Poland

Role Purpose:

We are looking for a software QA with minimum 2 years of experience Testing JS and HTML web applications to join our Platforms team in our new office in Kraków. The platforms team is responsible to develop trading platforms using the in-house web applications. They also integrate with internal and third-party solutions. You will be working as part of a scrum team, focused on high quality deliverables to meet business requirements.

Scope of Responsibilities:

- Review and analyze system specifications.
- Collaborate with other QA engineers to develop effective strategies and test plans
- Execute test cases (manual) and analyze results
- Evaluate product according to specifications
- Create logs to document testing phases and defects
- Report and troubleshoot bugs and errors with development teams
- Conduct pre-release/post-release/ post-implementation testing
- Work with cross-functional teams to ensure quality throughout the software development lifecycle
- Interpret, evaluate, and implement quality assurance standards
- Plan, conduct and monitor testing and inspection of materials and products to ensure finished product quality
- investigate customer complaints and non-conformance issues
- assure ongoing compliance with quality and industry regulatory requirements
- investigate product quality in order to make improvements to achieve better customer satisfaction
- collaborate with the Product Development team to ensure consistent project execution
- identify quality assurance process bottleneck and suggest actions for improvement
- oversee continuous improvement projects

Skills & Experience required:

- Experience with HTML5, CSS, XML, API, Angular and Protractor
- Working in an Agile/Scrum process
- Working with streaming data and real time systems
- Gradle Build Tool, GIT, TeamCity, HockeyApp, Testlink, Jira, Confluence
- Working in a trading floor environment
- Experience in communicating with customer, users, other technical teams and management to collect requirements, identify tasks, provide estimates and meet production deadlines
- Experience with professional software engineering best practices for the full software development life cycle, including coding standards, code reviews, source control management, build processes, testing and operations
- Strong communication and collaboration skills
- Ability to communicate in English
- Strong experience with system analysis, understanding design and functional requirements and specifications
- Excellent knowledge of QA methodologies
- Experience with cross-browser and cross-platform testing
- Critical thinker and problem-solving skills
- Team player
- Good time-management skills
- Great interpersonal and communication skills

Offer:

- ♥ Work in a startup-like environment that encourages ideas and creativity
- ♥ A team of experienced developers helping each other improve their skills
- ♥ Ability to choose the equipment you work with
- ♥ Standing desk and ergonomic chair
- ♥ Spacious and cozy office space in the heart of old Kraków
- ♥ Flexible working hours and the possibility to work remotely
- ♥ Competitive benefits package, including health care and gym pass (Multisport)
- ♥ Kitchen full of coffee, tea, snacks, and fresh fruit
- ♥ Salary in line with the market
- ♥ Co-working, mentoring and personal development

Interested candidates should send their resume (CV) to magdalena.wielgos@itpuzzle.com.pl with „**Senior Automation QA Engineer**” in the subject line.
