Senior Back-end Engineer

Location: Warsaw, Poland

Responsibilities / Accountabilities:

You will take on the responsibility of designing, building, deploying and maintaining cloud based microservices and APIs that power our user experience.

This will include:

- Participating in building the overall architecture behind our product, with a particular focus on availability, scalability and risk management;
- Working directly with the Product Owner and other stakeholders to find optimal solution for business problems;
- Performing hands-on development of the back-end services, including design, writing production code, automated tests and infrastructure as code (IaC);
- Establishing practices in the back-end architecture and development;
- Participating in driving the team towards the best craftsmanship practices.

Professional Qualifications/ Experience:

Fast learners with a passion for technology and getting things done well. We expect a track record of problem solving, design skills and great people skills.

Baseline expectations:

- A University degree in Computer Science or equivalent, with a rock-solid foundation in data structures, algorithms, software design;
- Experience with: .NET Core, C#, cloud technologies, SQL & NoSQL databases, REST APIs, service-oriented architecture, git, Unit Testing, SOLID, DDD, Agile;
- At least 3 years of experience as a Back-end Engineer, with an excellent command of API design, scalability and maintainability of a software project;
- The ability to communicate effectively with other engineers, designers and product owners;
- Fluency in English.

Nice to have:

- A solid grasp of development and testing best practices and continuous integration tools in an Agile environment;
- Experience with: microservices, extreme programming practices, TDD, CQRS, Event Sourcing, functional programming, F#, asynchronous communication models, Linux, Azure, IaC, PaaS;
- The ability to scale real-time distributed systems to support hundreds of requests per second

Offer:

- Challenge, opportunities to exchange skills within multinational Team
- Ability to work in an autonomous way and in an environment where your ideas are valued
- Casual and very friendly atmosphere
- Competitive salary aligned with experience
- Training
- Flexi-time and home office
- Benefits (covered or co-financed): Health care, Multisport card, Life insurance,
- French and Polish classes
