IT PUZZLE
RECRUITMENT

We are a technology recruitment partner focused on search and selection of IT experts internationally. Currently, we are looking for an accomplished experts for the role of Senior Program Manager. We offer a rewarding and exciting professional experience and opportunity to develop your career in a highly competitive international environment.

Senior Program Manager

Role Purpose:

In this role, you will lead large scale strategic transformational programs including pitching, defining and refining ideas with technical leaders and executives.

You will work with several business units and technical teams to understand specific business needs, assist in the design of technical solutions and then work with engineering teams to deliver them on an ambitious schedule.

A key part of your role will also include assessing risks, developing risk mitigation plans, anticipating and resolving bottlenecks, managing issue escalation, and balancing the business needs with technical concerns and compliance requirements.

You will be an exceptional communicator with a successful track record of keeping key colleagues engaged and informed on the progress of critical projects.

Scope of Responsibilities:

- Lead and support Project Managers/Scrum Masters/Product Owners in the full project life cycle: creation, development, and execution as well as documenting the project's scope, budget, justification, expected business impact, and establishing the right project governance
- Continuously oversee projects to ensure they are meeting company and technical standards, adhering to budgets, aligned with business expectations and meeting deadlines
- Facilitate the program events and processes and assist the teams in delivering value
- Manage communication with the program stakeholders, escalate impediments, help manage risk and drive relentless improvement.
- Coordination of activities between the teams and the rest of the organization.
- Use and continually develop leadership skills

Skills & Experience required:

- Degree in Computer Science or Computer Engineering or related technical discipline.
- A successful track record of leading complex projects/programs in software development
- Demonstrable experience in leading agile initiatives, preferably at scale
- Must have excellent organizational skills, as well as a great deal of autonomy and positive attitude.
- Excellent communication skills, being able to present complex technical information in a clear manner to a variety of audiences including executives and non-technical leaders.
- Solid organizational skills including attention to detail and multitasking skills
- Flexible working hours, to accommodate different time zones.

Offer:

- challenge, opportunities to exchange skills within multinational team
- ability to work in an autonomous way and in an environment where your ideas are valued
- interesting trainings
- health care
- Multisport card
- French classes
- flexi-time and home-office
- competitive salary aligned with experience
- casual and very friendly environment
- possibility to work in other Client location
