Software Engineer (SEO)

Location: Krakow/remote

Role Purpose:

We are looking for a Full Stack Software Engineer with previous commercial experience in building .NET websites with a strong focus on SEO, to join our Websites Development team. The Websites Development team is responsible for the client facing marketing websites. You will be working as part of a scrum team, focused on high quality deliverables to meet the business requirements for SEO.

Scope of Responsibilities:

- ◆ You will work in a scrum team located in Kraków and the New Jersey to deliver new components of the public websites.
- ◆ You work closely with the Marketing SEO team to identify opportunities for improvement and growth of our marketing website SEO, focused on both backend performance as well as modern front end practices.
- ◆ You, our ideal candidate will have a good understanding of modern web development technologies, feature rich CMS systems, and supporting highly trafficked global websites.
- ◆ They should be experienced with the full cycle of a software project: conception, development, deployment, and the continuous improvement stage.
- ◆ You will take an active role in the entire sprint process from estimation and design to feature rollout and you will work with and pair with other members of the team of all disciplines, BA, QA and other developers.
- ◆ We build our platform with quality in mind. You will work closely with QA to ensure that all changes are properly understood, testable, and automated where it is sensible.
- ◆ You will be expected to maintain a high level of conduct, ethical standards and values as well as maintain an appropriate level of competence through ongoing training, making requests for updates or development as required.

Skills & Experience required:

- ◆ 3-5 years of .Net web application development
- ◆ C#, ASP.NET MVC, .NET Core,
- ◆ HTML5, JavaScript, JQuery, TypeScript, CSS/SASS, SCSS/LESS
- ◆ REST WebAPIs
- ◆ MSSQL: T-SQL with JSON, transactions, concurrency, locking
- ◆ Visual Studio 2019 with ReSharper
- ◆ Git (Bitbucket)
- ◆ TeamCity, Powershell
- ◆ NUnit, Moq
- ◆ Commercial experience as a software developer, delivering enterprise level applications serving multiple end users and including exposure of full SDLC
- ◆ Previous commercial SEO web application development
- ◆ Able to use browser developer tools efficiently to detect improvements needed in different areas like performance, audits etc.,
- ◆ Diverse software development principles concurrency design patterns, dependency injection, inversion of control, performance profiling and tuning
- ◆ Knowledge of distributed network architectures
- ◆ Experience in a service-oriented architecture

Skills & Experience required:

- ♥ Experience in an agile environment and Scrum methodologies
- ♥ Basic understanding of security concepts like API authentication/authorization, encryption, windows certificates
- ♥ Experience working with distributed, multidisciplinary teams
- ♥ Sitecore CMS experience, or experience with similar CMS

Qualification and Skills

- ♥ Bachelor's degree or higher in Engineering (Computer Systems, Software, IT&T, Systems)
- ♥ Undertaking unit, integration & UI automated testing
- ♥ Strong verbal and written communication skills (English)

Offer:

- ♥ Work in a startup-like environment that encourages ideas and creativity
- ♥ A team of experienced developers helping each other improve their skills
- ♥ Ability to choose the equipment you work with
- ♥ Standing desk and ergonomic chair
- ♥ Spacious and cozy office space in the heart of old Kraków
- ♥ Flexible working hours and the possibility to work remotely
- ♥ Competitive benefits package, including health care and gym pass (Multisport)
- ♥ Kitchen full of coffee, tea, snacks, and fresh fruit
- ♥ Salary in line with the market
- ♥ Co-working, mentoring and personal development
