We are a technology recruitment partner focused on search and selection of IT experts internationally. Currently, we are looking for an accomplished experts for the role of Senior Software Engineer. We offer a rewarding and exciting professional experience and opportunity to develop your career in a highly competitive international environment.

Senior Software Engineer

Location: Krakow/remote

Role Purpose:

Working as part of the Team, you will be responsible for the design, development and testing of several key projects within the pricing and risk management. Work streams will include both business initiatives and technology modernization requirements. You will be working on strategic initiatives to modernize our existing technology stack based on a distributed scalable microservice based architecture. You will be expected to make an active contribution to this process and be prepared to offer ideas and solve problems at every stage of each project.

Scope of Responsibilities:

- Perform detailed requirement, design, and code reviews to ensure thorough due diligence is applied.
- Understand individual business requirements in order to design, develop and test effective solutions.
- Understand and implement required development guidelines, design standards and best practices at all times.
- Understand in detail the business operational process both before and after the impact of any software changes.
- Take responsibility for analysis, design, and development to ensure due diligence is applied consistently to all software changes.
- Ensure software releases support continuous build and automated deployment practices.
- Provide prompt and knowledgeable assistance to business continuity and platform operations whenever requested.
- Work to identify risks and enhance control across the business.

Skills & Experience required:

Essential Skills, Knowledge & Experience
- .NET Developer (primary skill)
- Multi-threading and concurrency
- Working in an Agile, Scrum process

Desirable Skills, Knowledge & Experience
- C#, .NET 5
- REST API
- gRPC
- protobuf
- Linux command line
- WPF
- ActiveMQ
- Teamcity
- Ansible
- Experience in developing desktop applications
- Working with streaming "real time" messaging in a distributed enterprise
- Python

Offer:

- Work in a startup-like environment that encourages ideas and creativity
- A team of experienced developers helping each other improve their skills
- Ability to choose the equipment you work with
- Standing desk and ergonomic chair
- Spacious and cozy office space in the heart of old Kraków
- Flexible working hours and the possibility to work remotely
- Competitive benefits package, including health care and gym pass (Multisport)
- Kitchen full of coffee, tea, snacks, and fresh fruit
- Salary in line with the market
- Co-working, mentoring and personal development

Interested candidates should send their resume (CV) to
