

We are a technology recruitment partner focused on search and selection of IT experts internationally. Currently, we are looking for an accomplished experts for the role of Advanced Platforms QA Automated Tester. We offer a rewarding and exciting professional experience and opportunity to develop your career in a highly competitive international environment.

Advanced Platforms QA Automated Tester

Location: Cracow -remote

Role Purpose:

We're inviting experienced quality assurance analysts to join us in a journey in the world of exotic platforms, delivering best of class solutions that enhance our customer experience and help them achieve their financial goals. This team will be responsible for delivering proprietary Signals which are based on our in-house developed prediction engine, predicting the market movements in real time. We will provide you an opportunity to work on this engine and enhance it by bringing in new features and prediction models.

The team will also be looking after our integration with Meta Quotes platform to provide full trading functionality, as well as an additional distributed system based on Windows Services that communicate via message broker systems. The solution relies heavily on multi-threading and low-latency communication. Additionally, you will also take care of our FIX and Direct Market Access features provided on our current platforms.

And not to miss that the team will be responsible for the performance, stability, and reliability of all solutions from inception to delivery of the product.

We work as a team using an agile scrum approach and are looking forward to move into micro-services based architecture using Docker & Kubernetes.

If the above excites you, then we have all ears for it and would like to schedule some time and discuss this opportunity with you

Scope of Responsibilities:

- ◆ Liaise with the business/developers/BAs at concept stage to determine testing strategy and coverage
- ◆ Determine if the software will perform according to the user request and conform to guidelines
- ◆ Assess the impact and risks of new functionality introduced into the system
- ◆ Actively participate in sprint planning sessions and ensure requirements are clear and complete
- ◆ Provide accurate estimation for sprint planning
- ◆ Create test cases, BDD specifications and data (manual and automated)
- ◆ Ensure that adequate test coverage is provided
- ◆ Participate in team stand ups
- ◆ Actively implement Test Automation where possible
- ◆ Understand and maintain the existing test automation suite where required
- ◆ Execute test scripts and analyze and record results
- ◆ Identify defects/anomalies and investigate their cause. Document and track these defects.
- ◆ Recommend improvements or corrections to developers or system analysts
- ◆ Review logs and reports to identify program processing errors and possible improvements
- ◆ Document high level user guides and train others in new functionality areas or software tools
- ◆ Monitor multiple projects/software changes from concept to release and confirm correct behavior after release to live
- ◆ Be responsible for all phases of testing across various test environments
- ◆ Coordinate with Service Delivery teams to ensure the timely and correct release of software to live
- ◆ Contribute towards improving the QA process and quality standards across the organization
- ◆ Evaluate testing tools and software that can be implemented to aid QA and maximize testing coverage
- ◆ Be an active participant in sprint retrospectives and take any actions forward for continual improvement on the team's ability to deliver
- ◆ Actively participate in knowledge sharing and team building exercises and be a champion of knowledge sharing

Skills & Experience required:

- ◆ Relevant degree or equivalent training
- ◆ Good knowledge of the software development lifecycle
- ◆ Good knowledge of QA practices and processes
- ◆ Experience of testing web and client-server applications
- ◆ Experience working in an Agile environment and BDD
- ◆ Experience in testing financial applications especially Trading platforms and services and reporting solutions
- ◆ Experience in testing RESTful, SOAP as well as windows services.
- ◆ Experience working in all phases of software testing right from requirements analysis up until QA/UAT sign off and release to live
- ◆ Basic SQL skills
- ◆ Experience in building, deploying and releasing software by working with developers
- ◆ Experience working with version control, build & deployment and test management tools preferably Microsoft Team Foundation Server and Test Manager
- ◆ Experience in debugging software
- ◆ Experience in reviewing application code
- ◆ Experience in building tools and utilities for automating testing tasks
- ◆ Strong in Programming fundamentals and ability to program in at least one programming language (preferably C#) would be beneficial
- ◆ Experience in test automation using a BDD tool (preferably Fitness) is a plus
- ◆ Knowledge about WPF testing is a plus.
- ◆ Good business/ financial knowledge especially Trading CFDs, spread betting and Forex would be helpful

Offer:

- ◆ Ability to choose the equipment you work with
- ◆ Standing desk and ergonomic chair
- ◆ Spacious and cozy office space in the heart of old Kraków
- ◆ Multisport Benefit Plan (the employee pays only tax)
- ◆ Health Care (the highest package with Psychologist + option to add the whole family)
- ◆ Life Insurance for employees (the employee pays only tax)
- ◆ Lunch vouchers (PLN 200 gross per month)
- ◆ Tax deduction (Creative rights) program (80%)
- ◆ 100% remote work with opportunity to use the office on demand
- ◆ Annual bonus dependent on company results and personal performance up to 10% of the annual gross remuneration
