

We are a technology recruitment partner focused on search and selection of IT experts internationally. Currently, we are looking for an accomplished expert for the role of QA Automation Engineer (Appium). We offer a rewarding and exciting professional experience and opportunity to develop your career in a highly competitive international environment.

QA Automation Engineer (Appium)

Location: Warsaw, Poland

Job Description:

We're on the lookout for a QA Automation Engineer to join our amazing QA team. You will focus on assuring the best quality for cutting-edge mobile/web apps for IoT, wearables, and connected devices. You'll have an assigned buddy, a person from your team who'll help you onboard smoothly, get to know our company, and enhance your skills. You will work in the Polish time zone for our U.S.-based clients.

Responsibilities / Accountabilities:

- ◆ Creating detailed, comprehensive, and well-structured test plans and test cases.
- ◆ Writing automation tests using the Appium or Detox framework.
- ◆ Estimating and planning QA involvement in our projects
- ◆ Performing regression testing.
- ◆ Establishing and tracking quality assurance-related metrics in our projects.
- ◆ Testing mobile applications.
- ◆ Mentoring less experienced team members to help them succeed and grow.
- ◆ Participating in the requirement discussion meetings and daily calls, providing feedback on inconsistencies and open issues.
- ◆ Taking part in knowledge sharing with other tech freaks.

Professional Qualifications/ Experience:

- ◆ A proven track record in testing automation (4 years or more).
- ◆ Experience in automating tests with Appium (optionally Detox) framework.
- ◆ Experience with test case management tools (e.g. TestRail, Qase) and Atlassian tools.
- ◆ Practice with manual mobile application testing.
- ◆ At least B2 English skills (both written and spoken).
- ◆ Out-of-the-box thinking and creativity (we care about your problem-solving skills).
- ◆ Keeping track of the industry trends and taking the initiative to incorporate these into the company technologies.
- ◆ Engagement and team-play.

Tools you'll use:

- ◆ Jira, Confluence.
- ◆ Slack, Zoom, GSuite.

It'd be nice if you have:

- ◆ Working experience in the creation and maintenance of automated tests on web applications.
- ◆ Hands-on experience with CI/CD (e.g. Circle CI, Jenkins).
- ◆ Experience in API testing (Postman preferred) and database testing.
- ◆ Experience in working in Agile or Scrum environments.

Offer:

- remote/office (up to you),
- flexible working hours,
- up to 26 paid holidays
- additional 10 days of paid sick leave on B2B,
- private medical care (PZU) and Multisport card,
- English lessons with a native speaker,
- knowledge-sharing activities (company library, internal and external hackathons, conference budget, team sessions).

Interested candidates should send their resume (CV) to magdalena.wielgos@itpuzzle.com.pl with " **QA Automation Engineer (Appium)** " in the subject line.
