Currently, we are looking for an accomplished experts for the role of QA Automation Engineer (WD). We offer a rewarding and exciting professional experience and opportunity to develop your career in a highly competitive international environment.

QA Automation Engineer (WD)

Location: Cracow -remote

Role Purpose:

We are looking for a quality assurance automation engineer with previous experience building test harnesses and automated tests to join our Web Development team in our new office in Kraków. The Web Development team is responsible for the client facing web applications and internal API's to provide client acquisition, onboarding, and servicing solutions. You will be working as part of a scrum team, focused on high quality deliverables to meet business requirements.

Scope of Responsibilities:

- ◆ You will work in a self-contained scrum team located in Kraków to deliver new components of the onboarding system that is developed in United Kingdom and Poland.
- ◆ Ideal candidates have a good understanding of RESTful API architecture and modern web application design. They should be experienced with the full cycle of a software project: conception, development, deployment, and the continuous improvement stage.
- ◆ You will take an active role in the entire sprint process from estimation and design to feature rollout and you will work with and pair with other members of the team of all disciplines, BA, DEV, and other QA engineers.
- ◆ We build our platform with quality in mind. You will build upon Unit Tests using .Net technology stack (C#/Selenium/Specflow) provided by the developers to ensure strong automated functional and integration coverage of new features while also ensuring up to date automated regression coverage for existing features.
- ◆ You will work with the product team to ensure end to end functionality meets initial expectations before a new feature is shipped.
- ◆ You will be expected to maintain a high level of conduct, ethical standards and values as well as maintain an appropriate level of competence through ongoing training, making requests for updates or development as required

Skills & Experience required:

- ◆ Previous QA experience working on web and mobile based applications
- ◆ Proficiency in Object Oriented Programming & Design
- ◆ Previous extensive automation testing experience on .Net stack, on web and mobile applications
- ◆ Proficiency with C# and selenium
- ◆ Ability to build and maintain automation frameworks using .Net/C#/Selenium
- ◆ Experience working with Restful APIs
- ◆ MS Visual Studio and TFS
- ◆ SQL Server - TSQL
- ◆ Strong communication and collaboration skills
- ◆ Ability to communicate in English on a daily basis

Good to have

- ◆ Experience with BDD, and exposure to respective tools like SpecFlow or similar
- ◆ Experience with Ecommerce based applications.
- ◆ Experience with client onboarding fraud & compliance systems
- ◆ Experience working with distributed, multidisciplinary teams

Offer:

- ◆ Ability to choose the equipment you work with
- ◆ Standing desk and ergonomic chair
- ◆ Spacious and cozy office space in the heart of old Kraków
- ◆ Multisport Benefit Plan (the employee pays only tax)
- ◆ Health Care (the highest package with Psychologist + option to add the whole family)
- ◆ Life Insurance for employees (the employee pays only tax)
- ◆ Lunch vouchers (PLN 200 gross per month)
- ◆ Tax deduction (Creative rights) program (80%)
- ◆ 100% remote work with opportunity to use the office on demand
- ◆ Annual bonus dependent on company results and personal performance up to 10% of the annual gross remuneration
- ◆ Flexible working time
- ◆ Very attractive referral bonus
- ◆ Office parking available for employees FOR FREE
- ◆ Kitchen full of coffee, tea, snacks, and fresh fruit
- ◆ Co-working, mentoring and personal development

Interested candidates should send their resume (CV) to magdalena.wielgos@itpuzzle.com.pl with „**QA Automation Engineer (WD)**” in the subject line.
