

We are a technology recruitment partner focused on search and selection of IT experts internationally. Currently, we are looking for an accomplished experts for the role of . Senior QA Engineer. We offer a rewarding and exciting professional experience and opportunity to develop your career in a highly competitive international environment.

Senior QA Engineer

Location: remote , Barcelona (Spain)

Scope of Responsibilities:

- ◆ Work closely with the functional team to define testing scope, automate tests, organize and review the automation effort of other feature team members:
- ◆ Work closely with the Developers to understand the features technically
- ◆ Create test design and test cases for developed User Stories and bugfixes
- ◆ Create the automation scripts and review the scripts created by Developers
- ◆ Maintain and improve the Automated script library for the team
- ◆ Collaborate in the QA process maintenance and improvements
- ◆ Identify improvements areas and propose solutions (process/technical)
- ◆ Participate in technical decisions
- ◆ Perform manual check of the developers work when needed
- ◆ Assist in mentoring and provide assistance to other Feature Team members to understand the Automation Framework
- ◆ Spread the Quality mindset across the Feature Team
- ◆ Can work unsupervised

Skills & Experience required:

- ◆ Degree or Master in Engineering in computer science field or other relevant degree
- ◆ At least 5+ years of experience in QA out of which 1+ in automated testing
- ◆ Practical knowledge of REST services, C#, Selenium, Jenkins, GIT, Postman
- ◆ Hands-on experience with Component Integration Test, Web Application Testing and Regression Testing
- ◆ Knowledge of SQL
- ◆ Familiarity with Scrum and Zalenium would be an asset
- ◆ Fluency in English required.

This role is 70-80% Automation with 20-30% manual effort (the more components are automated the less manual footprint will become)

Perfect candidate: We're looking for a person that already has some automation experience, but also is a strong team player. The person would become an owner of automation inside of the team, meaning he/she/they would be able to organize oneself as well as Developers in a way that encourages quality mindset across the entire team - to allow Developers to contribute into the Automated script suites.

Within a regular sprint this person should:

- ◆ participate in creating the test strategy as well as coverage strategy with unit/integration/e2e
- ◆ write a test plan that would need to be automated and agree with Developers who should automate what
- ◆ review Developer contributions
- ◆ maintain existing testbase and scriptbase (the latter by oneself or with developer help)
- ◆ if needed - check the small increments manually within the sprint
- ◆ if needed - check the bug fixes and close the resolved issues
- ◆ at code-freeze - check the overall integration of the User Stories and prepare the content to be deployed to Production by performing manual or automated tests
- ◆ perform exploratory testing if needed to identify extra issues that may arise

Offer:

- ♥ challenge, opportunities to exchange skills within multinational team
- ♥ ability to work in an autonomous way and in an environment where your ideas are valued
- ♥ interesting trainings
- ♥ French classes
- ♥ flexi-time and home-office
- ♥ competitive salary aligned with experience
- ♥ casual and very friendly environment
- ♥ possibility to work in other Client location

Interested candidates should send their resume (CV) to **magdalena.wielgos@itpuzzle.com.pl** with „Senior QA Engineer” in the subject line.
