

We are a technology recruitment partner focused on search and selection of IT experts internationally. Currently, we are looking for an accomplished expert for the role of Software Engineering Technical Lead. We offer a rewarding and exciting professional experience and opportunity to develop your career in a highly competitive international environment.

Software Engineering Technical Lead

Location: remote , Warsaw (Poland) or Barcelona (Spain)

Job Description:

Our Client is currently seeking a motivated Technical Lead to join our web applications teams.

As the technical leader of the development team, you'll be responsible for the architecture, design, and implementation of web-based solutions.

You'll not only spend time doing hands-on development, but you'll also define architectures for new projects, perform code reviews, and mentor junior and mid-level developers.

You'll actively collaborate with geographically-dispersed, cross-functional teams to integrate, test, and deliver complex software solutions in a timely fashion.

The ability to self-direct, collaborate with remote team members, and interface with Product Management are key for this role.

Responsibilities / Accountabilities:

- Take the ownership over architecture qualities (e.g.: availability, resilience, and scalability) of all solutions you build and deliver. Promote technical excellence within the engineering team via everyday craftsmanship
- Work within an agile team to design, develop, test, implement, and support technical solutions across full-stack development tools and technologies.
- A passion for growing each person on your team through coaching, motivation, and leading by example
- Work with Team Leader & Product Owner to understand desired application capabilities.
- Promote technology expertise with insights about current technology trends and solutions
- Identify and characterize technical risk throughout SDLC and generate mitigation options.
- Help determine how best technology can be applied to meet our customer's needs.

Professional Qualifications/ Experience:

- 7+ years working experience as a senior software engineer
- 2+ years in design and architecture review
- 2+ years building modern web applications based on Web APIs (REST, RPC-over-HTTP, WebSockets, CQRS, DDD etc.)
- Expert knowledge in build web applications & Web HTTP APIs based on .NET stack with C# - ASP.NET MVC / Web API / Core, MS SQL Server.
- Practical experience with building enterprise JavaScript applications using React+Redux is a plus.
- Experience working in an Agile/Scrum development process
- Ability to interview and contribute to the selection and training of engineers
- Experience and clear understanding of how to plan and execute within iterations and sprints
- Ability to work well in an international and multicultural environment in a fast-growing company.
- Experience building enterprise-grade, public-facing web applications
- Bachelor degree, Master of Engineering in computer science field or other relevant degree.
- Fluency in English required.
- Self-driven and team player.

Offer:

- ◆ Challenge, opportunities to exchange skills within multinational Team
- ◆ Ability to work in an autonomous way and in an environment where your ideas are valued
- ◆ Casual and very friendly atmosphere
- ◆ Competitive salary aligned with experience
- ◆ Training
- ◆ Flexi-time and home office
- ◆ Benefits (covered or co-financed): Health care, Multisport card, Life insurance,
- ◆ French and Polish classes

Interested candidates should send their resume (CV) to **konrad.witek@itpuzzle.com.pl** with "**Software Engineering Technical Lead**" in the subject line.
