Senior Solution Architect

Location: remote , Warsaw (Poland)

Perfect candidate:

You will directly contribute (as a part of cross-competence team) to conceptual envisioning, design & development of a unique, software platform that has defined (& still drives the overall direction) of a completely new industry - CSR.

In a highly collaborative environment you'll take part in brainstorming new ideas, prototyping & continuously validating them against ever-changing market reality - to drive the platform evolution in completely new ways that couldn't have been predicted up-front.

- ◆ Communicate with business, analyze and suggest efficient solutions based on their requirements
- ◆ Define and maintain architecture roadmap, technical solutions for new and existing functionality for each parts of the projects
- ◆ Deliver architectural services, including guidance and conceptual design as well as technical and process innovations
- ◆ Work with developers to generate and maintain code according to the agreed coding standard and best practices
- ◆ Investigate latest technology and build quick Proof of Concept functionalities to address future business needs
- ◆ Preparing, improving and introducing new approaches/methodologies/tools and techniques within department
- ◆ Preparing, reviewing and validating software technical blueprints.

Professional Qualifications/ Experience:

- ◆ At least 5 years of experience as a Senior Architect or Lead/Chief Architect role;
- ◆ Excellent knowledge of all aspects software engineering process, including Coding, Testing, Deployment, Scalability, Security, Maintainability;
- ◆ Excellent knowledge of Microsoft stack (.Net, .Net Core, Web API, SQL Server, Azure);
- ◆ Extensive experience in defining and enforcing architectural patterns (SOA, CQRS, Event Sourcing etc.);
- ◆ Proven experience in designing, building and maintaining microservices architectures with a deep understanding of best practices, design patterns, and principles for highly decoupled and scalable systems;
- ◆ Demonstrated ability to apply strategies for efficient communication, data consistency, and resilience across microservices, including experience with API design, message-based communication, and event-driven architectures;
- ◆ Very good knowledge in NoSQL such as CosmosDB, MongoDB, Cassandra, Redis, Elasticsearch, for either data persistence and/or caching;
- ◆ Vast experience in API Management (routing, gateways, versioning) with profound understanding API Development aspects;
- ◆ Solid experience in implementing observability, monitoring, and logging solutions to effectively track system performance, diagnose issues, and ensure the health and stability of our SaaS applications, with knowledge of popular tools and frameworks for these purposes;
- ◆ Extensive experience in Front-End, including frameworks (Angular, React/Redux etc.), patterns (MV*), understanding client's point of view on performance aspects;
- ◆ Experience in working with global and regional projects, virtual expert teams, appreciating local differences and adapting to difference in cultures;
- ◆ Excellent interpersonal and communication skills;
- ◆ Proficiency in English.

Offer:

- ◆ Challenge, opportunities to exchange skills within multinational Team
- ◆ Ability to work in an autonomous way and in an environment where your ideas are valued
- ◆ Casual and very friendly atmosphere
- ◆ Competitive salary aligned with experience
- ◆ Training
- ◆ Flexi-time and home office
- ◆ French and Polish classes
