

We are a technology recruitment partner focused on search and selection of IT experts internationally. Currently, we are looking for an accomplished experts for the role Senior Cloud Engineer . We offer a rewarding and exciting professional experience and opportunity to develop your career in a highly competitive international environment.

## Senior Cloud Engineer

Location: hybrid /Warsaw, Poland

Join Cloud Operations department where you get to contribute significantly to development and operations of award-winning IT security product within the Identity and Access Management area.

The service that we're building will shape the future of the IAM/IAG Industry and will set the benchmark for our competitors.

We're utilizing the latest cutting-edge technologies to achieve those goals.

The development and operations are done according to DevOps principles in an agile team. Usability, cost-effectiveness, as well as operational excellence (scaling, geo-redundancy, data privacy, etc.), are key performance indicators for the success of our service.

Our office in Warsaw, is providing attractive working conditions for our employees and we are ready for the many new colleagues that we will be hiring in the coming months. Your responsibility as a Senior Cloud Engineer:

### Scope of Responsibilities:

- Working in our DevOps team in Poland responsible for the development and operations of the platform hosting the Client Identity Cloud.
- Build and deploy .NET Framework, Microsoft SQL Server and Power BI based production environments
- Building and operating the environments for all OISaaS customers.
- Automating the daily operations tasks, implement preventive maintenance automations as well as monitoring of the environments.
- Engage closely with software architects, software engineers and IT team to deliver highly available and scalable services
- Build automation scripts and frameworks to improve operational processes and procedures
- Learn, deploy and document newer technologies for the potential deployment of services following a development and release lifecycle
- Drive ongoing improvements and efficiencies in operational practices, tools & processes
- Provide a seamless transition of the application from Product Development to Production Support teams
- Support Microsoft Network configurations as relates to server deployments
- Prepare and implement backups and disaster recovery plans
- Support production service and environment escalations as needed

## Skills & Experience required:

- ♥ You are an experienced Azure Automation Engineer or Cloud Specialist with at least three (3) years' experience.
- ♥ You probably have a higher IT education such as bachelor or master.
- ♥ You have excellent knowledge of Cloud and DevOps.
